This document is intended to provide a description of the configuration and usage of the Synergy Streams Collaboration Tool.
Chapter One:
STREAMS COLLABORATION TOOL SETUP

In this chapter, the following topics are covered:
► Streams Collaboration Tool Overview
► How to Enable and Configure Streams
STREAMS OVERVIEW

The Streams Collaboration Tool allows users to maintain a running dialog with each other within the Synergy education platform, using an easy-to-use and intuitive social media-type interface. Users can create private ‘Streams’ to communicate with other staff, in addition to being able to create groups where content can be shared with several users at one time. Communication occurs via posts – users can post documents, web links, and text to a Stream, as well as respond to others’ posts.

Additionally, to encourage and facilitate home/school collaboration, parents, and students can communicate with school staff via the Streams link icon in various ParentVUE and StudentVUE web portal locations and the Streams tab. This feature is enabled by the school district.
